About

Software Developer with 4 years of experience in AI-powered applications, enterprise automation, and BI solutions. At Vestel, I build RAG-based and LLM-powered chatbots used across the company, from an HR assistant available to ~10,000 employees to a multilingual sales assistant for global offices. Pursuing an MSc in Computer Engineering with a focus on Artificial Intelligence.

Experience

VESTEL, Software Specialist

Manisa, TR

Oct 2024 – Present

- Co-developed “Ask HR”, a RAG-based chatbot in the internal mobile app available to ~10,000 employees; built the backend with retrieval and response validation (Python, FastAPI, Azure OpenAI, ChromaDB).
- Led and developed most of an AI sales assistant on a microservice architecture, letting sales teams query orders, allocations, products, and costs in multiple languages; used by 30–40 users across global offices (Python, FastAPI, React + TypeScript, Azure OpenAI).
- Built an AI supplier fraud detection tool that scores incoming emails to flag fraudulent senders; in final stage before rollout to 10–12 users (Python, Azure OpenAI).
- Designed Azure DevOps CI/CD pipelines deploying all AI projects to Ubuntu servers; managed work with Jira and Azure DevOps using AI coding assistants.
- Delivered 4 automated business processes (RPA) and contributed bug fixes to internal applications.

Inci Akü, Software Specialist Assistant

Manisa, TR

Oct 2022 – Oct 2024

- Developed enterprise BI reports and data workflows using MSSQL, T-SQL, SQL Server Agent, SAP-ABAP, and Power BI.
- Improved ETL processes and reporting efficiency for manufacturing and business operations.
- Built JavaScript-based workflow automations that improved manual processing time by approximately 50%.
- Supported the SAP ECC to SAP HANA migration process through data analysis, process review, and reporting adaptations.

SISKON Industrial Software Automation, Intern

Izmir, TR

Mar – Jun 2021

- Developed a Python-based Microsoft Teams chatbot to automate repetitive tasks.
- Improved SQL stored procedures and contributed to development workflows using Docker and Git.

Republic of Turkey Ministry of Environment and Urbanisation, Intern

Ankara, TR

Jul – Aug 2019

- Contributed to the development of an online login system using Java and MSSQL.

Education

MSc, Computer Engineering (Focus: Artificial Intelligence) – Manisa Celal Bayar University

Expected Feb 2027

BS, Computer Engineering – Manisa Celal Bayar University

2016 – 2021

Skills

Languages: Python, TypeScript, JavaScript, SQL, T-SQL, SAP-ABAP, Java

AI & LLM: Azure OpenAI, RAG, ChromaDB, Prompt Engineering, AI Coding Assistants

Development: FastAPI, React, Microservice Architecture, REST APIs

Data & Automation: Microsoft SQL Server, SQL Server Agent, Power BI, ETL, RPA, Workflow Automation

DevOps & Tools: Azure DevOps, CI/CD, Linux (Ubuntu Server), Git, Bitbucket, Docker, Jira

Spoken Languages: Turkish (Native), English (Upper Intermediate, B2)
