About

Software Developer with 3+ years of professional experience in full-stack web development, AI-powered application development, and enterprise automation. Currently working at Vestel as a Software Specialist, developing internal platforms, automation systems, and AI-powered tools. Pursuing an MSc in Computer Engineering with a focus on Artificial Intelligence.

Experience

VESTEL, Software Specialist

Manisa, TR

Oct 2024 – Present

- Built an AI chatbot backend with a RAG pipeline, document retrieval logic, and response validation using FastAPI, Azure OpenAI, and ChromaDB.
- Developed a full-stack project management platform with .NET 8 (Clean Architecture, CQRS) and React + TypeScript. Implemented status workflows, Excel import/export, email notifications, and role-based access control.
- Migrated complex SQL queries to Entity Framework Core and built management UI components in React. Designed Azure DevOps CI/CD pipelines for automated builds and deployments.
- Designed an automated document screening pipeline with AI-powered scoring and ERP/SAP data integration using Python and Azure OpenAI.
- Developed Python-based validation tools with configurable business rules, semantic comparison, and structured Excel reporting.
- Built ETL data pipelines with retry/checkpoint mechanisms, batch processing, and dual-sink output to Excel and SQL Server.

Inci GS Yuasa, Software Specialist Assistant (Full-time)

Manisa, TR

Oct 2022 – Oct 2024

- Developed enterprise BI reports and data workflows using MSSQL, T-SQL, SQL Server Agent, SAP-ABAP, and Power BI.
- Improved ETL processes and reporting efficiency for manufacturing and business operations.
- Built JavaScript-based workflow automations that improved manual processing time by approximately 50%.
- Supported the SAP ECC to SAP HANA migration process through data analysis, process review, and reporting adaptations.
- Contributed to mobile project development processes using Bitbucket for version control and team collaboration.

SISKON Industrial Software Automation, Intern

Izmir, TR

Mar – Jun 2021

- Developed a Python-based Microsoft Teams chatbot to automate repetitive tasks.
- Improved SQL stored procedures and contributed to development workflows using Docker and Git.

Republic of Turkey Ministry of Environment and Urbanisation, Intern

Ankara, TR
Jul – Aug 2019

- Contributed to the development of an online login system using Java and MSSQL.
- Worked with Maven and MVC architecture in a web application development environment.

Education

MSc **Manisa Celal Bayar University**, Computer Engineering

Expected Graduation:

- **Focus:** Artificial Intelligence

Feb 2027

BS **Manisa Celal Bayar University**, Computer Engineering

Sept 2016 – July 2021

- **Graduation Project 1: *Mobile Application*** – Java, Android Studio, SQLite; included photo upload, notes, and map navigation.
- **Graduation Project 2: *Technical Service Desktop & Web Applications*** – C#, MSSQL, DevExpress; web service for product tracking.

Technologies

Languages: Python, C#, TypeScript, JavaScript, Java, SQL, T-SQL

Backend: .NET 8, ASP.NET Core Web API, FastAPI, Entity Framework Core, MediatR, Node.js

Frontend: React, Vite, HTML/CSS

AI & LLM: Azure OpenAI, LangChain, LangGraph, ChromaDB, RAG, BM25, Prompt Engineering

Databases: Microsoft SQL Server, PostgreSQL

Tools & Platforms: Git, Azure DevOps, Swagger

Skills

Architecture: Clean Architecture, CQRS, Repository Pattern, Microservices

Practices: REST API Design, ETL Pipelines, CI/CD, Agile/Scrum, Technical Documentation, AI-assisted Development

Integration: SAP SOAP Services, Microsoft Copilot Studio, Azure Cloud Services

Automation: Enterprise Automation, Rule-Based Validation, Excel Reporting, Workflow Automation

Languages

Turkish: Native

English: B2 – Upper Intermediate
